**SGS ANNUAL COURSE IN ADVANCED
GYNECOLOGIC SURGERY**

COURSE DESCRIPTION

Join us in this virtual event focusing on the surgical management of the full spectrum of advanced gynecologic surgical problems and approaches; including surgical education, technique and evidence-based approaches to improve surgeon competence and patient outcomes. Emphasis will be on teaching pelvic anatomy, learning vaginal hysterectomy and other minimally invasive gynecologic surgeries. This year's course features optional roundtables that allow for small group discussion and a Remote Hands-On Suturing course that you will not want to miss!

GENERAL SESSION TOPICS INCLUDE

- Female Pelvic Anatomy
- Robotic and Laparoscopic Surgery
- Chronic Pelvic Pain
- Endometriosis
- Managing Complications
- Vaginal Surgery
- Pelvic Organ Prolapse
- Covid Surgical Updates

WHO SHOULD ATTEND?

The SGS conference is designed for obstetricians/gynecologists and sub-specialty fellows. Residents and fellows are welcome to attend the didactic sessions at reduced rates.

REMOTE HANDS-ON LAPAROSCOPIC SUTURING WORKSHOP

December 6, 2020
10:00 am - 7:00 pm EDT

This remote hands-on laparoscopic surgical skills training course is designed to provide robust curriculum leveraging the highest fidelity and most engaging surgical simulation. The "All-hands-on All-the-time" course format is based on the validated surgical educational principle of "supervised deliberate practice". As well, the course teaches general surgical skill and procedure-specific technique with then application in "reiterative fashion to progressively more challenging and complex surgical simulations." It is designed to provide transformative surgical skill advancement.

The equipment, while complex, has been developed to provide "plug and play" utility. All the necessary equipment is delivered to individual attendees with setup and breakdown remotely guided and supervised. Day-of-course tech monitoring and help is provided to promote attendee focus on training: attendees open the course, train intensively, and pack the course away for return.

MOC IV

The ABOG MOC standards now allow participation in ABOG-approved Simulation Courses to meet the annual Improvement in Medical Practice (Part IV) MOC requirement. This course has been approved to meet ABOG Improvement in Medical Practice requirements until . Please review the current MOC Bulletin for further information: <https://www.abog.org/about-abog/bulletins>
