PRESIDENT'S WELCOME

As the President of the Society of Gynecologic Surgeons, I am excited to welcome you to Tucson and the JW Marriott Starr Pass Hotel & Spa for our 49th Annual Scientific Meeting!

I'd like to first recognize Dr. Amy J. Park (Program Chair) and Dr. Sawsan As-Sanie (Program Co-Chair), and the entire Scientific Program Committee, for organizing an *exceptional program* focused around the theme of *Impact Factor*. With internationally renowned keynote speakers, stimulating panel discussions, TED-style talks, and a combination of oral podium presentations, videos, and posters that cover a variety of multispecialty topics in gynecologic surgery, we'll share the latest science and focus on how SGS impacts the care we give, the communities we serve, and the training we provide for the next generation of gynecologic surgeons.

We are fortunate to have amazing leaders and innovators for our keynote speakers. This year's 3rd Annual Mark D. Walters Lectureship, *Surgeons in the C-Suite*, will be presented by Dr. Beri Ridgeway, Chief of Staff at the Cleveland Clinic. Dr. Ridgeway will provide insight into the optimal delivery of care and leadership. The 2023 TeLinde Lecture, *Biomaterials for Gynecologic Surgeons: Toward Bio-inspired Biomimetic Devices*, will be delivered by Pamela Moalli, MD, PhD, ObGyn Professor, University of Pittsburgh, and the McGowan Institutes of Regenerative Medicine at Carnegie Mellon University. Both speakers will provide important information about the current and future state of gynecologic surgery.

I hope you've made time to attend our pre-conference courses and workshops, organized by leaders in gynecologic

surgery. You can still register for any of these sessions onsite:

- *Innovations in Training Gynecologic Surgeons*, chaired by Dr. Cecile A. Ferrando and including other Cleveland Clinic faculty Drs. Cara Robinson King, Vicki Reed, as well as Dr. George Wendel (ABOG Executive Director)
- *Urologic Surgery for the Gynecologic Surgeon: GU Injury, Ureteral Stents, Complex Fistula and More*, with Drs. Brian J. Linder and John B. Gebhart (Mayo Clinic, Rochester, MN)
- **NEW!** *SGS Fellows/Young Attending Course*, moderated by Drs. Matthew Barker, Sadikah Behbehani, and Traci Ito
- *The Sim Factor: Making an Impact in Surgical Education*, chaired by Drs. Veronica Lerner (Lenox Hill Hospital, Northwell Health) and Mireille Truong (Cedars-Sinai) with course faculty Grace Chen, Christine Vaccaro, Christine Helou, Payton Schmidt, and Whitney Horner
- *Advanced Endometriosis Surgery and Pelvic Pain: Patient Centered Approach*, chaired by Dr. Ted Lee (University of Pittsburgh) and speakers Drs. Shannon Cohn, Sadikah Behbehani, Linda Yang, Sawsan As-Sanie, Nucelio Lemos and Jon Einarsson.
- *Social Media Workshop: #Gynfluencing: Using Social Media to Find Your Digital Voice*, with co-directors Drs. Jocelyn Fitzgerald and Mireille Truong

New to the SGS program this year are TED Med/SurgEd Talks by Jason D. Wright, MD, Editor-in-Chief of the Green Journal; Ebony B. Carter, MD,

Green Journal Associate Editor, Equity; and Kelly Wright, MD, Cedars-Sinai, addressing controversial issues related to gynecologic surgical volume; diversity, equity, and inclusion in ObGyn; and sustainability in the operating room, respectively.

There will also be multiple Academic Roundtables covering a wide variety of topics in a small group setting – a perfect opportunity to question experts. The Scientific Program Committee has also included a very relevant panel, *Ergonomics of Gynecologic Surgery*, moderated by Drs. Amanda Fader and Kimberly Kho, with speakers Drs. Ladin Yurteri-Kaplan, Susan Hallbeck, and Noor Abu-Alnadi.

Our networking sessions and social events are always a highlight of the meeting and make our meeting so enjoyable. Join us for the Welcome Reception on Sunday evening from 06:00 PM – 07:00 PM. Starting at 08:30 PM that evening, be sure to attend the SGS Equity Council session (formerly the Women's Council), *What Your Patients REALLY Want to Know*. This presentation will be given by Patty Brisben, philanthropist and founder of Pure Romance and the Patty Brisben Foundation, dedicated to raising funds for research focusing on sexual health.

On Monday evening, the President's Reception will be held from 07:15 PM – 08:30 PM, immediately following the Annual Awards Ceremony. The oral presentations and discussions, including late-breaking abstracts and educational videos, are the hallmark of the meeting and 2023 will be no exception. Tuesday morning will kick-off with a yoga session led by Mireille Truong, and Tuesday afternoon leisure activities will feature the Annual SGS Golf Tournament as well as a hiking tour. Spa facilities and the lazy river are also very appealing activities! Our afternoon of leisure culminates with

the not-to-be-missed Tuesday evening SGS FUNdraiser, Under the Arizona Skies. Tickets for these events can still be purchased at the registration desk, so plan to join us!

No matter where you are in your career, SGS has a dedicated research group meeting here in Tucson to meet your needs – from the Fellows Pelvic Research Network (FPRN)[®] designed to ignite multi-center research projects among fellows, to the Systematic Review Group (SRG), to the Collaborative Research in Pelvic Surgery (CoRPS) group for members focused on multi-center research who are more advanced in their careers.

I am very grateful and honored for the opportunity to serve with members of the SGS Board and all the SGS committee volunteers who have made this the go-to meeting for gynecologic surgery education and research.

Let's begin!

Fondly,

Cheryl Iglesia
SGS President 2022-2023

MISSION STATEMENT

SGS TEAM CHALLENGE

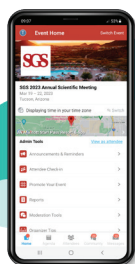

Join in the fun with the SGS Team Challenge! Each attendee has been assigned to a team; there are four teams in total. Pick up your sticker at the Registration Desk and find your teammates with the same sticker/color! Teams will earn points by participating in challenges and activities related to the following 4 pillars: **Scholarship, Social, Philanthropy, and Wellness.**

The Teams: **Team Red, Team Blue, Team Green, Team Yellow**

The Details:

- 1 Scholarship:** Daily Trivia comes to your app each morning. Fill it out and test your knowledge of SGS history and GYN surgery.
- 2 Social:** Daily Challenges like posting a picture featuring a new member or a mentor. Find the challenge in the thread in the Community Board in the app to post your photos. "Social Sunday," "Meet-up Monday," and "Teacher Tuesday" photo challenges allow the photos with the most likes in the app to win a prize, and all those who post on social media will earn points and a chance at prizes too!
- 3 Philanthropy:** The team who gets the most donations (number of donations) and raises the most money will win this pillar! Prizes will be raffled each day for donors, with lots of philanthropy fun at the "Taste and Toast with SGS" fundraiser on Tuesday night.
- 4 Wellness:** Post a photo daily in the "Wellness" thread on the Community Board in the app of whatever makes you feel well (going hiking, joining yoga, early to bed, catching up with old friends, etc.).

The Team Challenge culminates with team games Tuesday night at the **"Taste and Toast with SGS"** event. Come represent your team for a night of fun and a chance for your team to claim the Golden Uterus trophy!

When posting photos, make sure to include your team hashtag!

**#SGSTeamRed, #SGSTeamBlue,
#SGSTeamGreen, #SGSTeamYellow.**

This map illustrates the layout of the Arizona Biltmore Hotel grounds. Key features include:

- Buildings:** Building 1 (Executive Boardroom, ATM, Hashaan Spa, Hakk-Salon, Spa Boutique), Building 2 (Towel Cabana), Building 3 (Plunge), Building 4 (Front Desk, Lobby, Concierge, Southwest Trekking), Building 5, and Building 6.
- Recreation:** Spa Lap Pool, Reflection Pools, Dancing Springs, Tash Lawn, and Meecha Lawn.
- Facilities:** Starbucks, Hashaan Spa, Hakk-Salon, Spa Boutique, Executive Boardroom, ATM, UPS, and Primo.
- Paths:** Ak Bridge, Keng-Mena Path, and To Mission Rooms, Arizona Ballrooms, Tucson Ballrooms & Self Parking Garage.
- Other:** Spa Primo Parking, Salut Terrace, Signature Grill, and various accessibility icons.

MARK D. WALTERS LECTURE

Beri Ridgeway, MD

Chief of Staff, Cleveland Clinic

SURGEON IN THE C-SUITE

 Monday, March 20, 2023

 09:50 AM - 10:30 AM

Beri Ridgeway, MD, is Chief of Staff of Cleveland Clinic. She joined the Cleveland Clinic professional staff in 2009. Previously, she served as Associate Chief of Staff, Institute Chair of the Obstetrics, Gynecology, and Women's Health Institute and was the inaugural academic chair for the Cleveland Clinic Lerner College of Medicine Department of Obstetrics, Gynecology, and Reproductive Biology.

She attended medical school at the University of California, San Francisco and completed a four-year residency in Obstetrics and Gynecology at University of California, San Diego. She completed a three-year fellowship in Female Pelvic Medicine and Reconstructive Surgery and Minimally Invasive Surgery at Cleveland Clinic.

Dr. Ridgeway has authored more than 80 peer-reviewed articles and 10 book chapters and made numerous presentations at national and international meetings. Her research interests include surgical correction of pelvic organ prolapse and uterine-sparing operations to treat prolapse and combined pelvic floor disorders.

In her leadership roles, Dr. Ridgeway was involved in the first responses to the pandemic, and she developed teams to wind down surgical services in preparation for the surge of patients with COVID-19. In these efforts, she managed initiatives to increase access for patients via surgical cases, face-to-face visits and telehealth.

As Chief of Staff, she is honored to lead more than 4000 extremely talented physicians, scientists, and doctors. She continues to practice alongside her colleagues.

BIOMATERIALS FOR GYNECOLOGIC SURGEONS: TOWARD BIOINSPIRED BIOMIMETIC DEVICES

📅 Tuesday, March 21, 2023

🕒 10:20 AM - 11:05 AM

Dr. Moalli is a Professor in the Department of Obstetrics, Gynecology and Reproductive Sciences at the University of Pittsburgh with secondary appointments in the Department of Bioengineering, the McGowan Institute of Regenerative Medicine, and the Clinical and Translational Institute at the University of Pittsburgh; and Adjunct Professor of Bioengineering at Carnegie Mellon University. Dr. Moalli serves as the Division

Director for Urogynecology and Reconstructive Pelvic Surgery and is a senior scientist at the Magee-Womens Research Institute. In 2022, Dr. Moalli was selected to serve as the Vice Chair of Translational Research Development for the Department.

After completing her undergraduate degree at Brown University, Dr. Moalli received a combined MD/PhD from Northwestern University. She served her residency in Obstetrics and Gynecology at Magee-Womens Hospital of the University of Pittsburgh and then completed a fellowship in Urogynecology and Reconstructive Pelvic Surgery at the same institution. Dr. Moalli has been funded by the NIH since entering medical school in 1986. She progressed from the Medical Scientist Training Program to the Women's Reproductive Health and Career Development Program (K12) to become independently funded in multiple R01 grants and alternate PI on three U01 awards. She has published over 134 peer reviewed scientific papers and 13 book chapters. Her Web of Science h-index is 36. Dr. Moalli is a regular NIH study section peer reviewer and has also served as a reviewer for the Swiss National Science Foundation. She has served on numerous committees for AUGS. She is current Chair of the Basic Science Subcommittee and Vice Chair of the Pelvic Floor Disorders National Registry.

Dr. Moalli co-directs the Translational Research Laboratories in Urogynecology – an interdisciplinary group that studies mechanisms that contribute to the development of pelvic organ prolapse and the development of biomaterials for improving outcomes of Urogynecologic procedures. Over the last decade, her major research focus has been on understanding the pathogenesis of synthetic mesh complications which cause significant morbidity in affected women and have been the target of litigation world-wide. More recently, her group has been working on the development of novel regenerative materials that can be used to repair pelvic organ prolapse and urinary incontinence. Additional research interests include mechanisms of maternal birth injury and improving outcomes in women injured during childbirth.

PANEL DISCUSSION

ERGONOMICS OF GYNECOLOGIC SURGERY

📅 Tuesday, March 21, 2023

🕒 12:10 PM - 12:55 PM

Drs. Kim Kho and Amanda Nickles Fader will moderate this panel featuring Drs. Noor Abu-Alnadi, Ladin Yurteri-Kaplan, and Susan Hallbeck. It will review work-related musculoskeletal disorders, surgical instrument/device issues, and best practices in surgical and office ergonomics.

SURGICAL VOLUME AND OUTCOMES FOR GYNECOLOGIC SURGERY: IS MORE ALWAYS BETTER?

 Monday, March 20, 2023

 08:55 AM - 09:15 AM

Procedural volume is recognized as an important predictor of outcomes for a variety of surgical procedures. This presentation will examine the association between hospital and physician procedural volume and outcomes for gynecologic surgery, examine how the measurement of volume is being used to guide care in gynecologic, and explore the limitations of surgical volume in gynecology.

CLIMATE CHANGE STARTS AT 07:15

 Monday, March 20, 2023

 11:25 AM - 11:45 AM

Climate change is the biggest global health threat of the 21st century, yet the healthcare industry accounts for more carbon emissions than aviation, with the United States contributing 27% of healthcare emissions despite only having 4% of the world's population. Multiple studies now link climate change, pollution, and waste to poor obstetrical outcomes, surgical outcomes, and endocrine disruptions. Surgery as practiced today is unsustainable. This session will present the evidence for reducing our carbon footprint for the benefit of our own health and the health of our patients.

CENTERING EQUITY IN REPRODUCTIVE HEALTH RESEARCH

 Monday, March 20, 2023

 02:35 PM - 02:55 PM

We will discuss best practices to promote health equity in research through conceptualizing, designing, analyzing, reporting, and reviewing study findings.

2023 INDUSTRY PARTNERS

APPLIED MEDICAL

📍 Booth # 305

Applied Medical designs, develops, manufactures and sterilizes healthcare solutions that enable advanced surgical procedures and optimize patient outcomes. We achieve this while also reducing healthcare costs and offering unrestricted choice. Applied Medical is committed to furthering minimally invasive surgery by offering sophisticated training, including workshops, symposia and our simulation-based programs.

ATHENA SURGICAL

📍 Booth # 302

Athena's Surgical goal is to bring innovation to midurethral slings that have been the standard of care for over 20 years. We worked alongside leading stress urinary incontinence surgeons to reengineer a new RMUS system to meet the needs of patients, the clinical and safety requirements of physicians and the economic realities of today's healthcare environment.

AXENA HEALTH

📍 Booth # 209

Axena Health, Inc. is a women-led company dedicated to improving the lives of women with pelvic floor disorders. Axena Health's flagship product, the Leva® Pelvic Health System, offers a novel, effective, first-line treatment for urinary incontinence (UI) and chronic fecal incontinence (FI), underreported conditions affecting over 78 million and 12 million women in the U.S. alone. Axena Health's technology enables non-invasive, drug-free treatment via precise visualization of movement in real time during pelvic floor muscle training, while monitoring usage and progress.

AXONICS, INC.

📍 Booth # 407

Axonics® is dedicated to improving the quality of life of people suffering from bladder and bowel dysfunction, conditions that impact the lives of tens of millions of adults globally. The Company's products include the Axonics Sacral Neuromodulation Systems designed to treat overactive bladder and fecal incontinence and the Bulkamid® hydrogel designed to treat women with stress urinary incontinence. For more information, visit www.axonics.com and www.bulkamid.com.

BOSTON SCIENTIFIC

📍 Booth # 111

Boston Scientific continues to invest in delivering the most comprehensive clinical research and most-studied portfolio of pelvic floor products in the industry, so you can feel confident you're providing your patients with the best therapy options. Visit our booth and speak with a representative to learn more.

CALDERA MEDICAL

📍 Booths # 202/204

Caldera Medical is a medical device company solely focused on women's health with a commitment to our mission of "Improving the Quality of Life for Women!" We develop, build and market best in class surgical products for the treatment of Stress Urinary Incontinence, Pelvic Organ Prolapse, and Polyps. Working closely with surgeons to help those here at home, as well as women around the world, through our humanitarian programs to give them the access to the education and treatment they deserve.

COLOPLAST

📍 Booth # 101

Coloplast makes life easier for people with intimate healthcare needs. A leading global innovator of medical devices, Coloplast is proudly committed to Women's Health, helping physicians around the world treat patients suffering from urinary incontinence and pelvic organ prolapse. Products include Restorelle®, Altis® and Aris®.

D. A. SURGICAL / TRENGUARD

📍 Booth # 205

Prevent Patient Sliding in Trendelenburg - up to 40° and 450 lbs. • Sliding in Trendelenburg can cause post-operative pain or serious injury. Even the smallest unintended movement can be a big problem in robotic-assisted surgery. • The TrenGuard™ Trapezius bolster is proven to prevent patient sliding in steep Trendelenburg, without the use of shoulder braces or chest straps. • Designed to improve OR efficiencies, TrenGuard simplifies patient repositioning and sets-up in under 2 minutes.

ETHICON

📍 Booth # 400

At Ethicon, a Johnson & Johnson MedTech company, putting humanity at the core of care is our passion and our purpose. In collaboration with clinicians and health care experts around the world, we develop clinically-differentiated surgical technologies and solutions to help address some of the most pressing health challenges of our time such as metabolic disease, cardiovascular disease and cancer. Through our efforts and ingenuity, we aspire to elevate standards of care and create a healthier future for the patients of today and tomorrow. Visit www.ethicon.com to learn more about us.

GBR MEDICAL

📍 Booth # 308

GBR Medical's mission statement: We deliver innovative solutions that help improve the healthcare journey.

GYNESONICS, INC / SONATA TREATMENT

📍 Booth # 408

The Sonata System combines real-time intrauterine ultrasound guidance with targeted radiofrequency ablation in an incisionless procedure to treat most fibroid types including submucous, intramural, transmural, and subserous. The Sonata Treatment is an incisionless solution, clinically proven to reduce fibroid symptoms and can address a wide range of fibroid types, sizes, and uterine locations. Multiple fibroids can be treated during a single procedure and delivers an alternative to hysterectomy and myomectomy. On average, women return to normal activity in a few days. Most patients see improvement in heavy menstrual bleeding within 3 months.

HALO MEDICAL TECHNOLOGIES

📍 Booth # 410

2D and 3D High Resolution Endoanal & Pelvic Floor Ultrasound. Custom tailored for all pelvic floor applications including for complete visualization of all anatomy and conditions including defecation disorders/sphincter defects, mesh detection/visualization, prolapse and dynamic imaging. Unique software tailored to pelvic floor allows for quick and easy 5-minute exams including an auto generated EMR ready exportable report. Affordable configurations for every budget.

2023 INDUSTRY PARTNERS

are designed to improve OR setup, efficiency, patient comfort and safety while reducing costs.

NORTHGATE TECHNOLOGIES INC

📍 Booth # 311

Pioneers in minimally invasive surgical technology, Northgate Technologies Inc. has been manufacturing, designing, and innovating since 1984. NTI is committed to providing optimal value and experience in the OR by implementing superlative technology, safety, and ease of use within our insufflation, closed-loop smoke evacuation, and accessories designed for minimally invasive and robotic procedures. Visit www.ntisurgical.com to learn more or request a trial.

ORIGAMI SURGICAL INC.

📍 Booth # 109

Origami Surgical has developed the StitchKit® technology to enhance robotic-assisted surgery by allowing the surgeon to manage all aspects of suture use and needle disposal in clear view. StitchKit® contains all the sutures needed for the given robotic surgery plus a SHARPS container into which used needles are placed throughout the case. At the end of the surgery, StitchKit® is removed from the surgical field with the used needles stored safely inside. StitchKit® can be used with a 12mm port or through an 8mm port incision. Our technology is designed to improve safety, autonomy, and surgical efficiency.

PACIRA BIOSCIENCES, INC.

📍 Booth # 201

Pacira BioSciences, Inc. (Nasdaq: PCRX) is the industry leader in its commitment to non-opioid pain management and regenerative health solutions to

improve patients' journeys along the neural pain pathway. The company's long-acting local anesthetic, EXPAREL® (bupivacaine liposome injectable suspension) was commercially launched in the United States in April 2012. EXPAREL utilizes the company's unique and proprietary multivesicular liposome delivery technology that encapsulates drugs without altering their molecular structure and releases them over time. In April 2019, Pacira acquired the iovera® system, a handheld cryoanalgesia device that delivers precise, extreme cold to targeted nerves. To learn more about Pacira, visit www.pacira.com.

PIMA COUNTY HEALTH DEPARTMENT - HEALTH DISPARITIES PROGRAM

📍 Booth # 403

The purpose of this project is to address COVID-19 related health disparities and advance health equity by expanding local capacity and services to prevent and control COVID-19 infection (or transmission) among populations at higher risk and that are underserved, including racial and ethnic minority groups and people living in rural communities.

PROVEPHARM INC.

📍 Booth # 208

With an impressive legacy of healthcare innovations and solutions spanning more than 20 years, Provepharm is at the forefront of developing innovative drugs from well-known molecules that advance therapeutic progress for the benefit of patients.

RICHARD WOLF MEDICAL INSTRUMENTS CORPORATION

📍 Booth # 309

Richard Wolf Medical Instruments is dedicated to improving patient outcomes through innovation in endoscopy. For over 100 years, Richard Wolf has pursued endoscopic solutions focused on improving surgical results while reducing patients' trauma. In the pursuit of the spirit of excellence, Richard Wolf prides itself on quality and innovation.

SOLV WELLNESS®

📍 Booth # 401

At Solv Wellness, we are elevating women with elevated science. We solve problems. Especially the ones that have been marginalized for too long. Our mission is to deliver meaningful products, for often stigmatized female health conditions that are backed by science. In other words, products with proven efficacy; Ellura®, a powerful non-antibiotic alternative for UTI management, Māge™, a probiotic designed for her, and Via™, a non-hormonal vaginal moisturizer.

SUTURE EASE, INC.

📍 Booth # 105

Suture Ease develops and markets novel technologies that combine efficacy and ease of use for laparoscopic procedures. The CrossBow Fascial Closure System, a Medical Design Excellence Award GOLD winner, utilizes an innovative "snare guide" mechanism to enable simple and reliable port site

wound closure. The latest technology is our award winning EzStitch Port Site Closure System. The device employs exceptional safety combined with an elegant and robust design, enabling surgeons to close with confidence.

TAEWOONG MEDICAL USA

📍 Booth # 103

TaeWoong Medical was founded in 1991 and obtained FDA and CE approval for Niti-ST™ brand products with excellence through product quality and technical expertise.
